We encourage you to follow our 5 Step Guide To Optimal Oral Health

- 1** Brush after every meal, but at least twice a day in the morning and evening using 2-5 drops of OraMD. Add drops to a toothbrush and brush as instructed by your dentist or hygienist.
- 2** Floss every evening after brushing – more frequently as needed. If appropriate, follow flossing with other dental tools that you are using and finish with a water irrigator.
- 3** Use OraMD as a mouthwash twice a day: morning and evening. Just put 2-5 drops into an ounce of water, swish and gargle. This is important to kill the bacteria in the entire mouth – including the back of the tongue.
- 4** Mid-morning, mid-afternoon, and as needed: put 2-5 drops on the tip of the tongue to coat the gum line and teeth to kill bacteria and keep breath fresh.
- 5** Follow the oral hygiene instructions provided by your dentist and hygienist. OraMD is more effective if you establish a good oral hygiene program and have regular dental checkups.

Now that you know more about OraMD and how to use it, the next step is ordering it. We've made it easy to order from our secure website, and you can also order by phone, toll free.

To order by credit card, visit your dentist's OraMD website listed below, and follow the easy step-by-step instructions.

Your dentist's OraMD website explains not only how easy it is to purchase OraMD, but also how to access testimonials, including the endorsement of Dr. Tom McGuire - a leading authority on preventive dentistry.

To order by phone, call us toll free at **888-423-7500** and be **sure to give our operator the name of your dentist.**
